

Strantrol® Controller Accessories HRR® Sensor Cleaner Solution

General Description

The proprietary formulation provides a convenient way to clean the Strantrol® sensors. The HRR® sensor cleaner is a mild concentrate that can be used undiluted or in a solution. The solution has a detergent quality that breaks down grease and an acidic quality that will dissolve any calcium deposits that are on the sensor's Teflon® junction. Cleaning with HRR® sensor cleaner will increase sensor life and allow the controller to more accurately control the water chemistry.
