

SureWater Technologies Feed Systems

“The Solution” feeders are adjustable wide range bulk chemical feed systems designed to improve operational safety and simplify the disinfection process while reducing costs. These products feature newly patented venturi (vacuum induction) feed technology rather than pressure associated with metering pumps.

“The Solution”

Features

- Designed for pools, fountains and water features between fifty thousand and one million gallons in volume
- Eliminates peaks and valleys in chlorine levels
- Maintains set point chlorination under the heaviest demands
- Significantly reduces chloramines – eliminates superchlorination
- Saves up to 40% in bleach costs
- Eliminates all parts and labor costs associated with metering pumps
- Virtually maintenance free
- Complete two-year warranty
- Rated at 1 million cycles
- Certified NSF/ANSI Standard 50
- Feed range is .1 gpm, or 144 gpd (min.) to 1.2 gpm, or 1728 gpd (max.)

*The X-2
SureWater Technologies, Inc*

“The Solution X-2”

Features

- Dual-purpose feeder, designed either to feed acid for pH and alkalinity control, or liquid chlorine in smaller volume pools, below fifty thousand gallons
- Eliminates peaks and valleys in disinfection levels
- Eliminates all parts and labor costs associated with metering pumps
- Virtually maintenance free
- Complete one-year warranty
- Rated at 2 million cycles
- Certified NSF/ANSI Standard 50 for use with sodium hypochlorite, hydrochloric acid and sulfuric acid
- Feed range is .2 gph, or 5 gpd (min.) to 8.2 gph, or 197 gpd (max.).

“The Solution” Chemical Feed Systems: More Effective, Safer to Use, Easier to Maintain... No more metering pumps, No more problems!
