OBSERVATION LIKE
NEVER BEFORE

NEW!

MANWAY COVER WITH VIEWPORT

Paragon Aquatics announces its latest Stark Filtration development, a manway cover with a viewport. This adds to the already renowned 6" Clear Backwash Valve in offering a way to visually observe the operation of the filtration system without dismantling.

The *NEW* Viewport manway cover retrofits to existing Stark Filters.

It is the mission of Paragon Aquatics to continually innovate and improve products and set new standards. You know that you can depend on Paragon Aquatics for Stark Filtration Systems and KDI Paragon Swimming Pool Equipment for trouble-free performance and longevity.
